

DipOH:

Question Choices for the Researched Essay

Faculty of
Occupational
Hygiene

The following questions are valid for candidates submitting their Researched Essay between **1st July** and **31st December 2020**. Candidates should select one question.

Candidates should refer to the '**Qualification Guide for DipOH**' for further information about writing their Researched Essay.

Question Choices:

1. Review sources of noise exposure in mixed livestock and arable farms. What factors might you consider in developing an effective noise management strategy?
2. Outline potential applications of "Wearable Technologies" (garments or devices worn on the body that monitor worker activity, posture, physiological responses, work environment etc.,) in occupational health or hygiene. How might wearable technology be used to reduce the risk of musculoskeletal injury in the workplace?
3. Review factors that affect the fit of a negative pressure respirator facepiece in the workplace. How reliable are respirator fit tests as a predictor of respirator performance for individual workers?
